

Status	Country	PI	Project title	Current n	Total n	Topic key words	Sample	Methodology	Project start	Contact member
On-going	UK	M.H. Johnson	British Autism Study of Infant Siblings (UK research network) <i>www.basisnetwork.org</i>	188	260	Brain, social, attention, motor, BAP, genetics, intervention	ASD siblings	Genetic, EEG, MRI, Behavior, standardized measures, questionnaire	May-08	m.elsabba gh@bbk.a c.uk
	UK	L. Gallagher				Mental rotation, social reward processing, attention orienting	Children & adolescents with ASD	fMRI, TBSS and DTI		LGALLAG H@tcd.ie
	Hungary	G. Gergely	Social cognitive mechanisms of understanding intentional agents in typical and atypical development	40	200	contingency detection, agency attribution, communication, ToM	ASD children and young adults	behavioral, eye tracking	April 2011	GergelyGy @ceu.hu
	Belgium	H. Roeyers	Social-communicative abilities in young children with ASD: the role of the mirror neuron system	55	100	social development, attention	ASD siblings	EEG, Behavior	Jan-07	Herbert.R oeyers@U gent.be
	Spain	G. Herrera M.	1)Pictogram Room 2) Neuropsychological signs and early detection of autism in early childhood			Augmented reality tech, Training, communication	ASD children	Observational, Natural interaction technologies, object tracking technologies, musical engines, augmented reality	1)-08 2)-11	Gerardo.H errera@u v.es
	Sweden	S. Bölte, T. Falck-Ytter, G. Gredebäck	Early Autism Sweden (EASE) <i>www.earlyautism.org</i>	0	100	Non-verbal communication, brain, motor, BAP, attention	ASD siblings	NIRS, eye tracking, observation scales, questionnaires	Jan-11	terje.falck- ytter@psy k.uu.se

Status	Country	PI	Project title	Current n	Total n	Topic key words	Group	Methodology	Project start	Contact member
On-going	Netherlands	C. Kemner	I see what you mean: the basics of social processing		50	Excitation/inhibition, detail perception, face processing	Screen sample	EEG, eyetracking, fMRI	Jul-08	C.Kemner@umcutrecht.nl
	Finland	A. Kylliäinen	Attention and affective-motivational responses to eye contact in young children with severe autism		20	Gaze processing, eye contact	Children with ASD	Behavioural, EEG, skin conductance, heart rate	Sep-11	Anneli.Kylliainen@uta.fi
	France	C. Barthelemy	1)Change detection in autism, an IRMf and electrophysiological study 2) Comprehension of social interaction in autism spectrum disorders.		90	Vis. attention, hyper reactivity, face processing, MNS, voice processing	Children with ASD	EEG, eye-tracking, fMRI, clinical tools	1) 07 2) 10	catherine.barthelemy@chutours.fr
	Norway	C. von Hofsten	Understanding sociocommunicative development in ASD	0	>50	Social cognition	ASD children	Eye-tracking (including "live" eye tracking)	Fall, 11	c.v.hofsten@psykologi.uio.no
Planned	Romania	A. Miu				Genetics, emotion processing	Children with ASD	PCR genotyping, electrophysiological measures, cognitive tasks self-report instruments.		andreimiu@gmail.com
	Italy	F. Muratori	1) Prospective study on movement perception and performance in early autism: clinical predictors and neural correlates 2) Early atypical communication in autism: prospective and retrospective study			Motor development, cognitive development, socio-emotional development	ASD siblings, screen sample	home-video analysis, standardized assessment of motor development, HD-EEG, NIRS, fMRI, screening questionnaires	(Applications under review)	filippo.muratori@ipe.unipi.it
	Macedonia	S. Markovska				Face recognition and identification of facial emotions, attention, hyperactivity, information processing through ERPs	ASD children	Amsterdam Neuropsychological Test (ANT), Quantitative EEG, ERPs biofeedback, neurofeedback		smarkovska@yahoo.com
